

## Fort Asperen

Location: Acquoy, Netherlands

Design: Bureau SLA,  
Netherlands, bureausla.nl

Material: HI-MACS®, Alpine White

### The white house within the brown house.

A fascinating idea: the traditional wooden house with its heavy wooden-beamed roof was first gutted and then enhanced with an ultra-modern house within the house. The "little house" is entirely made of HI-MACS®. And once again it is clear how traditional wood and innovative HI-MACS® complement each other wonderfully.
